### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 12-15 and 23-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Alack USP 4,848,975.

See the previously attached marked up drawing sheets 2 of 4 and 3 of 4 depicting the claimed features. Alack teaches all of the claimed features except for “directly” connecting the membrane to the inner wall of the outer shell. It would have been obvious to utilize one of many ways to seal an inner membrane to an outer membrane and Alack teaches the sealing his inner membrane wall 5 to the inner wall 13 of the outer shell using several different extensions of the inner membrane wall 5 as outlined on the previously attached marked up drawing figures of Alack. The current independent claims are not detailed enough to overcome the above rejection as set out by Alack. The language “forming a connection” in both claims 12 and 23 is met by the device of Alack, just in a different way and clearly a functional equivalent.

### ***Response to Arguments***

3. Applicant’s arguments, see remarks, filed 10-15-2008, with respect to the rejection(s) of claim(s) 12-15 and 23-28 under 102(b) have been fully considered and are

Art Unit: 3651

persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made (see above).

***Conclusion***

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas A. Hess whose telephone number is 571-272-6915. The examiner can normally be reached on M-Thurs 5:30 - 4:00.
